

Cold Weather Kits

GENERAC®

GENERAC® ACCESSORIES

DESCRIPTION

The Cold Weather Kits consist of a battery warmer that has a thermostat built into the battery wrap. When temperatures fall below an acceptable level, the thermostat activates the battery warmer maintaining optimum battery temperature for the best generator starting. These kits are recommended for generators installed in regions where the temperature regularly falls below 32 degrees (Fahrenheit).

When installing a cold weather kit, it is required that the oil is replaced with 5W-30 synthetic for better engine start capability.

Cold Weather Kit	Description/Applicable Sizes	Use with Extreme Cold Weather Kit	Voltage	Watts	Amps
6175	1.5L 25/30kW	6174	120	50	.41
5630	2.4L 22/27/36/45/60kW	5616			
5632	5.4L 48kW	6204			
5632	4.6L 80kW	5619	120	80	.67
5632	6.8L 70kW	5620			
5632	6.8L 150kW	5667			
5633	6.8L 100kW & 130kW	5620
